● ABOUT ME

I am a recent Information Technology and Computer Science graduate majoring in Biomedical Informatics. My academic background and professional experience have equipped me with a strong foundation in software development, particularly in AI and machine learning, and expertise in programming languages such as JavaScript. I have a solid understanding of creating dynamic, user-focused applications, with a focus on clean, efficient, and scalable code. My strengths include problem-solving, analytical thinking, and adapting quickly to new technologies and challenges. I am also highly detail-oriented and committed to delivering high-quality solutions that meet user needs. I am eager to bring my skills, enthusiasm, and dedication to a software development team where I can contribute to meaningful projects while continuing to grow as a professional.
